Hot desking:
How to maximise the
benefits in the enterprise

 The Professionals' Choice™

www.kensington.com

Hot desking connectivity the reality

Hot desking - the practice of sharing selected desks between numerous employees – is on the rise across the globe as companies recognise that not every employee needs a permanent desk space. It is the smart and future-orientated working model for enterprises that want to succeed in the digital world. Hot desk environments must now accommodate USB-C™ and Thunderbolt™ 3 connectivity together with USB 3.0.

70%
have a mixed
estate of devices
or brands

“In your organisation, do you have a mixed estate of laptops - either an assortment of different manufacturers, or differing laptop models from the same brand?”
